As a recent graduate, I am eager to begin my professional career with a strong passion for front-end and web development. I am excited to apply my technical expertise in technologies such as React JS and React Native, along with my strong interpersonal skills in teamwork and deadline management, to contribute effectively to a dynamic team and grow within a forward-thinking organization.

Skills

- React.JS & React Native
- JS & ECMASCRIPT6
- Bootstrap
- HTML & CSS
- UI/UX
- PHP & SQL
- Leadership
- Commitment
- Communication

Education

- **Department of Information Systems, college of computer science and AI – HELWAN university**
  2020-2024

Internships

- **Intern - ITI React JS Summer Training**
  4/9/2023 - 18/9/2023
  - I studied React.JS from scratch during my summer training at ITI. I learned it thoroughly and reached a very good level. We trained, worked on tasks, and delivered a graduation project. I learned about the virtual DOM, real DOM, state, props, functional components vs class components, hooks, and many other concepts.

- **Intern – AL-ALFI and Ministry of Higher Education and Scientific Research**
  12/7/2023 - 19/7/2023
  - Soft skills sessions (Problem Solving – Time Management -Career Planning - CV Writing and Interview)

EXTRA-CURRICULAR-ACTIVITIES

- **IT Head -SCCI'23**
  8/2022-5/2023
  - Preparing content and sessions. I was responsible for forming the IT team and responsible for teaching and training them on web skills, frontend(HTML/CSS/JS/BOOTSTRAP) and backend(PHP/SQL/MYSQL). Then, together, we built the official SCCI website. generate attractive and professional website and generate new features in website like forms that calculate who is best team in conference.

- **IT Member -SCCI'22**
  10/2021 – 5/2022
  - I learned more technical skills in web development section and worked on official SCCI website with IT TEAM. I won the best IT member. technical support in 10 sessions. Got certified as best IT member.

- **TECHSOLVE Workshop Participant– SCCI'21**
  1/2021 – 5/2021
  - I learned a lot of soft skills and problem solving using software and hardware .Worked with teams from 5 workshops and learned how to be team player

Projects

- **Graduation Project**

  My graduation project involves creating a system where the user, who is the patient, enters their illness, the sector that matches their financial situation, and their current location. The system then displays the available hospitals that treat their condition, are close to them, and have available space. This way, the patient doesn't waste time going to a hospital that might not have space, doesn't treat their condition, or is far from them. **details and demo**

- **Dashboard**

  CRUD System project that displays customers, professors, and courses. It also allows for editing, deleting, and using React JS and many libraries. For more details, please provide further information. **details and demo**

- **E-Commerce**

  E-Commerce website built using React JS. I utilized the fakestore API to display real data and incorporated additional libraries. For more details, please provide further information. **details and demo**

- **SCCI**

  SCCI is a student activity affiliated with Cairo University, and I worked on their website when I was the Head of IT in 2023. After forming a team of 12 members, I trained and taught them various web programming languages. Together, we worked on the SCCI website, which is used to attract deals to the organization. The website is sent to companies to engage in deals with us. **website**
